Node JS Developer

Description

We are looking for a Node.js Developer to join our fun, energetic team who are running at full speed to ignite digital transformations. If you have strong Node.JS knowledge and a passion for team work, we have the perfect job for you!

Responsibilities

- Integrating the front-end elements built by your co-workers into the application.
- Develop all server-side logic, definition and maintenance of the central database.
- Code, test and operate node.js based services.
- Build customer-facing UI and back-end services for payment processing administration and management.
- Contribute to team and organizational improvements in process and infrastructure.

Skills

- Strong proficiency with JavaScript
- Knowledge of Node.js and various frameworks
- In depth knowledge of Node.js
- Hands on experience with HTML, CSS, and AJAX
- Development experience designing object oriented JavaScript and SVG
- Writing reusable, testable, and efficient code
- Design and implementation of low-latency, high-availability, and performance applications
- Applicable knowledge of web libraries and frameworks such as AngularJS, Polymer, and Closure
- Strong analytical skills and problem solving aptitude
- Proficient understanding of code versioning tools, such as Git
- Understanding differences between multiple delivery platforms, such as mobile vs. desktop, and optimizing output to match the specific platform
- Make sure to mention other frameworks, libraries, or any other technology related to your development stack
